My Passport™ AV

Portable Media Drives

Optimized for video storage and playback

WORLD'S BEST SELLING #1 WD EXTERNAL HARD DRIVES

Designed for AV use

Video storage and smooth playback

USB 2.0 powered

Optimized for AV devices, this handy little drive is the perfect solution for your video storage and playback needs. Transfer and store videos from your compatible camcorder and connect the drive to a game console, Blu-ray Disc player, or media player to smoothly stream video to your big screen TV.

PUT YOUR LIFE ON IT®

My Passport AV
Portable Media Drives

Product Features

Optimized for video storage and playback
The drive inside is a WD hard drive engineered for the audio/video market so this portable drive:
- stays cool even in a hot entertainment center
- uses less power to operate so it can work with compatible AV devices without the need for a power adapter
- delivers optimized streaming for smooth video playback

A light-weight storage companion for your camcorder
Instantly add more recording hours to your compatible camcorder. There's no need to delete your videos. Just transfer them to your My Passport AV media drive without a computer. You can even use the camcorder to play back the videos stored on the My Passport AV drive.

Play videos, music, and photos on your TV
Connect this AV-optimized drive to a WD TV media player, a game console or Blu-ray Disc player to enjoy your media on your big screen TV.

USB 2.0 powered
My Passport AV is USB powered and requires no separate power supply. Just plug it in to the USB port on your AV device for instant storage and playback.

Designed to fit in your entertainment center
The small My Passport AV drive fits neatly in your entertainment center and the included stand makes it easy to position the drive near your AV devices while maximizing airflow and minimizing heat around the drive.

As used for storage capacity, one megabyte (MB) = one million bytes, one gigabyte (GB) = one billion bytes, and one terabyte (TB) = one trillion bytes. Total accessible capacity varies depending on operating environment. As used for transfer rate or interface, megabyte per second (MB/s) = one million bytes per second, and gigabit per second (Gb/s) = one billion bits per second.
